# Winning business in the nuclear renaissance

The global revival in nuclear power and the wider move to a low carbon economy provide a major opportunity for manufacturing companies to get involved in the building and operating of the UK's new nuclear power stations as well as the nuclear decommissioning programme.

## Prepare your business for entry into the nuclear supply chain.

Now is the time to act to understand, prepare and set strategies for a future in the civil nuclear power industry. With support from the Nuclear Industry Association (NIA), the Nuclear Advanced Manufacturing Research Centre (Nuclear AMRC), and many of the key players in the nuclear industry, MAS have put together a knowledge transfer set of workshops to assist SMEs in winning business in the nuclear renaissance.

The workshops will help you understand the marketplace requirements and the support available to help manufacturers become serious competitors within this dynamic marketplace.

## Great reasons to attend:

- Find out what you need to do to be considered
- Learn how to tender winning contracts
- Discover how MAS, NIA and Nuclear AMRC can help you enter the civil nuclear market
- Learn how to improve your business capability through R&D to compete for business

## Who should attend?

CEOs and directors from small and medium size manufacturers interested in supplying the nuclear industry.

### Supply chain opportunities:

- Nuclear island components
- Turbine island components
- Electrical equipment
- Generator main connections
- Switchgear
- Mechanical equipment
- Pipework
- Pressure vessels and tanks
- Pumps
- Cranes
- Valves
- Heating, ventilation and air conditioning (HVAC)
- Site services and construction materials
